CONTENTS

Preface	ix
Glossary	xiii
Introduction	xvii
I STARTING UP A MICROBIOLOGY LABORATORY	I
Introduction	I
Safety Considerations	I
Laboratory Layout and Design	4
Basic Equipment	8
Conclusion	11
2 GROWTH PROMOTION TESTING	13
Introduction	13
Overview of Growth Promotion Testing	14
Isolate Maintenance	24
Use of In-house Isolates	28
Conclusion	31

3	BIOBURDEN TESTING	33
	Introduction	33
	Overview of Bioburden Testing	34
	Method Development and Validation Strategies	35
	Hold Time Studies	46
	Conclusion	50
4	MICROBIAL LIMITS TESTING	53
	Introduction	53
	Overview of the Microbial Limits Test	54
	Testing Methods	57
	Method Development	62
	Method Validation	67
	Clinical Versus Commercial Batches	74
	Routine Testing	75
	Stability Testing	77
	Conclusion	78
5	BACTERIAL ENDOTOXIN TESTING	81
	Introduction	81
	Overview of the Bacterial Endotoxin Test	82
	Testing Methods	87
	Important Calculations	91
	Method Development	93
	Method Validation	101
	Routine and Stability Testing	110
	Hold Time and Low Endotoxin Recovery Studies	115
	Conclusion	118
6	STERILITY TESTING	121
	Introduction	121
	Overview of the Sterility Test	122
	Testing Methods	126
	Method Development	128
	Method Validation	131
	Routine and Stability Testing	132
	Conclusion	135

7	UNDERSTANDING CONTAINER CLOSURE INTEGRITY TESTING	139
	Introduction	139
	Overview of Container Closure Integrity Testing	139
	Testing Methods	145
	Method Development	151
	Method Validation	154
	Stability Testing	156
	Conclusion	158
8	ANTIMICROBIAL EFFECTIVENESS TESTING	161
	Introduction	161
	Overview of the Antimicrobial Effectiveness Test	162
	Testing Methods	164
	Method Development	173
	Method Validation	178
	Stability Testing	191
	Conclusion	193
9	UNDERSTANDING PARTICULATE TESTING FOR INJECTABLE PARENTERAL PRODUCTS	195
	Introduction	195
	Overview of Particulate Testing	196
	Light Obscuration Particle Count Test	200
	Microscopic Particle Count Test	209
	Stability Testing	216
	Conclusion	217
10	DISINFECTANT EFFICACY TESTING	219
	Introduction	219
	Overview of Disinfectant Efficacy Testing	220
	Methods for Evaluation of Disinfectant Efficacy Testing	228
	Conclusion	237

I 1	THE MICROBIOLOGIST'S ROLE IN THE VALIDATION AND MONITORING OF PHARMACEUTICAL WATER SYSTEMS	241
	Introduction	241
	Overview of the Role of the Microbiologist in the Monitoring of Pharmaceutical Water Systems	242
	Microbiological Testing	250
	Pharmaceutical Water System Validation	254
	Routine Monitoring of the Pharmaceutical Water System	257
	Trending Data and Establishing Alert and Action Limits	259
	Conclusion	263
I 2	THE MICROBIOLOGIST'S ROLE IN ESTABLISHING AND MAINTAINING A COMPLIANT ENVIRONMENTAL MONITORING PROGRAM	267
	Introduction	267
	Overview of Environmental Monitoring	268
	Environmental Monitoring Testing Methods	277
	The Microbiologist's Role in Establishing an Environmental Monitoring Program	281
	Routine Environmental Monitoring	286
	Trending Data and Establishing Alert and Action Limits	289
	Conclusion	294
I 3	UTILIZING AND OBTAINING MICROBIAL IDENTIFICATION DATA	299
	Introduction	299
	Overview of Microbial Identifications	300
	Microbial Identification Methods	309
	Usefulness of Microbial Identification Data	312
	Scanning for Objectionable Microorganisms	315
	Conclusion	316
I 4	BIOLOGICAL AND ENDOTOXIN INDICATORS	319
	Introduction	319
	Overview of Biological and Endotoxin Indicators	320
	Various uses of Biological Indicators and Testing Methods	326
	Various uses of Endotoxin Indicators and Testing Methods	336
	Conclusion	344

15 SPECIAL STUDIES	347
Introduction	347
Overview of Special Studies	348
Feasibility Studies	348
Toxicity Studies	349
Minimum Inhibitory Concentration Studies	351
VHP Intrusion Studies	353
Conclusion	357
AFTERWORD	359
REFERENCES	371
INDEX	387
