

# ASEPTIC AND STERILE PROCESSING

CONTROL, COMPLIANCE  
AND FUTURE TRENDS

Edited by  
Tim Sandle and Edward C. Tidswell

# CONTENTS

<b>I</b>	<b>INTRODUCTION</b>	<b>I</b>
	<i>Tim Sandle and Edward C. Tidswell</i>	

## **PART A: STERILITY, RISKS AND REGULATIONS**

<b>2</b>	<b>STERILITY</b>	<b>17</b>
	<i>Edward C. Tidswell and Sarah E. Bennett</i>	
	Introduction	17
	The Purpose and Origins of Sterilization	20
	The Microbial Challenge	23
	Consequences of Non-Sterility and Lack of Asepsis	30
	What Does Sterile Mean and Can we Test it?	36
	Conclusion	40
	References	42
	About the Authors	50
<b>3</b>	<b>CONTAMINATION RISKS AND THE PATIENT</b>	<b>51</b>
	<i>Mark Hunter, Andrea Hunter, Michelle Luebke, Mark Pasmore</i>	
	Case Study Patient 1 – Pancreatitis and Bacteremia	52
	Case Study Patient 2 – Fungal Meningitis	52

	Infection	53
	Microbial Contamination in the Manufacturing Environment	79
	Conclusions	85
	References	86
	About the Authors	96
<b>4</b>	<b>CURRENT, IDEAL AND ANTICIPATED REGULATIONS FOR STERILE DRUG PRODUCTS</b>	<b>99</b>
	<i>David Hussong</i>	
	History of Sterile Products and Regulation	99
	Recent Evolution of Aseptic Processing	104
	Advanced Aseptic Processing	105
	Moving Forward	107
	References	111
	About the Author	115

## **PART B: ASEPTIC PROCESSING**

<b>5</b>	<b>ASEPTIC PROCESSING</b>	<b>119</b>
	<i>Eric Dewhurst</i>	
	Introduction	119
	Definitions and Terminology	121
	General Principles of Aseptic Processing	122
	Sterility Assurance Level v. Estimates of Aseptic Processes	
	Contamination Rates	124
	The Aseptic Processing Continuum – Open Cabinets	
	to Isolators	127
	Key Factors in Aseptic Process Control	
	– The Aseptic Process Definition	138
	Measuring Aseptic Process Performance	149
	Cell Based Healthcare Products (CBHP), and Advanced	
	Therapy Medicinal Products (ATMP)	153
	Current Hot Topics	154
	Future Developments	158
	Conclusion	158
	References	159
	About the Author	161

<b>6</b>	<b>BIOBURDEN CONTROL</b>	<b>163</b>
	<i>Edward C. Tidswell</i>	
	Introduction	163
	Bioburden and Microbial Contamination	164
	Microbial and Bioburden Control	167
	Bioburden Control in US Regulations	170
	Microbiological Risks and Bioburden Control	172
	Bioburden Monitoring	184
	Conclusion	188
	References	188
	About the Author	192
<b>7</b>	<b>ASEPTIC PROCESSING FILTRATION</b>	<b>193</b>
	<i>Maik W. Jorntz</i>	
	Introduction to Aseptic Processing Filtration	193
	Filtration Purposes and Needs	195
	Types of Filters	202
	Filter Materials and Differences	206
	Filter Designs and Construction	211
	Filter Qualification and Validation	213
	Integrity Testing of Filters	217
	Examples of Filtration Applications	225
	References	237
	About the Author	240
<b>8</b>	<b>MICROBIAL AND ENDOTOXIN CONTROL OF WATER SYSTEMS</b>	<b>241</b>
	<i>Teri C. Soli</i>	
	Why This Chapter and Why Now?	241
	Introduction and Scope of Chapter	244
	Why is “Microbial Control” so Important	245
	WFI System Design Options	255
	Challenges of Microbial/Endotoxin Control in Purification and Distribution	267
	Microbial Monitoring to Assess Success	290
	Investigation of Excursions	314
	WFI System Validation Expectations and Advice	324
	Change Control	332
	Pure Steam System Issues	337
	A Word About Paradigms	345

	Conclusions	349
	References	351
	About the Author	354
<b>9</b>	<b>DEPYROGENATION, NONPYROGENATION AND REPYROGENATION: A STUDY IN QUALITY BY DESIGN, RISK ASSESSMENT AND LIFECYCLE MANAGEMENT</b>	<b>355</b>
	<i>Karen Zink McCullough</i>	
	Endotoxins and Their Detection	355
	Nonpyrogenation	357
	Basic Philosophies and Their Application	358
	Depyrogenation	374
	Validation of Depyrogenation Methods	376
	Common Depyrogenation Methods	378
	Summary	384
	References	385
	About the Author	391
<b>10</b>	<b>MICROBIAL CONTAMINATION CONTROL IN CLEANROOMS</b>	<b>393</b>
	<i>Matts Ramstorp</i>	
	Pharmaceutical Cleanrooms and Clean Zones	393
	Measuring Cleanliness in Cleanrooms for Microbial Contamination Control	410
	Pharmaceutical Cleanroom Ventilation Systems	419
	Cleanrooms and Clean Zones	426
	Pharmaceutical Cleanroom Production Systems	438
	References	442
	About the Author	444
<b>11</b>	<b>ENVIRONMENTAL CONTROL AND ENVIRONMENTAL MONITORING IN SUPPORT OF ASEPTIC PROCESSING</b>	<b>447</b>
	<i>Tim Sandle</i>	
	Introduction	447
	Regulatory Requirements	450
	Environmental Control	453
	The Importance of the Environmental Monitoring Program	472
	Summary	530

References	531
About the Author	539
<b>12 ASEPTIC PROCESS SIMULATIONS/ MEDIA FILLS</b>	<b>541</b>
<i>Marco Budini and Francesco Boschi</i>	
Introduction	541
Risk Assessment	545
Documentation	546
Media Selection	549
Frequency and Number of Runs	554
Size and Duration of Runs	555
Line Speed and Container Size	557
Closure Type	559
Processes/Line Configuration and Set-up	559
Fill Volume	561
Number of Persons and Activities	562
Interventions	562
Line Clearance	567
Environmental and Personnel Monitoring	568
Other Worst Case Scenarios	572
Cleaning after Process Simulation	573
Incubation and Inspection of Filled Units	573
Growth Promotion Test	577
Interpretation of Results – Acceptance Criteria	579
Invalidation and Abortion of Process Simulation Runs	581
Investigation of Process Simulation Contaminations – Failures	582
Conclusions	592
References	592
About the Authors	594
<b>13 CLEANING AND SANITIZATION FOR ASEPTIC PROCESSING</b>	<b>595</b>
<i>Anne Marie Dixon-Heathman</i>	
Centre #1 – Gowning	596
Centre #2 – Procedures	598
Centre #3 – Admittance of Items	607
Centre #4 – Monitoring	610
Summary	612
References	612
About the Author	613

<b>14</b>	<b>CLEANROOM GOWNING</b>	<b>615</b>
	<i>Crystal M. Booth</i>	
	Introduction	615
	An Overview of Cleanroom Gowning	616
	Gowning for Grade D Areas	620
	Gowning for Grade C Areas	621
	Gowning for Grades B/A Areas	621
	Establishing a Compliant Aseptic Personnel Gowning Program	623
	FDA Warnings Pertaining to Poor Aseptic Technique and Gowning Practices	635
	Conclusion	637
	References	641
	About the Author	643
<b>15</b>	<b>THE STERILITY TEST: CURRENT PRACTICE AND FUTURE APPLICATIONS</b>	<b>645</b>
	<i>Tim Sandle</i>	
	Introduction	645
	Culture Based Sterility Test Methods (Compendial Methods)	648
	Test Controls	653
	Environmental Monitoring	653
	Sample Incubation and Reading	654
	Sterility Test Failures	657
	Culture Media	658
	Test Environment	661
	Method Validation (Method Suitability)	661
	Re-Validation	665
	CGMP Requirements	665
	Cellular Products	666
	Combination Products	667
	Rapid and Alternative Sterility Test Methods	669
	Limitations with the Sterility Test	683
	Conclusion	691
	References	692
	About the Author	699

## **PART C: RISK MANAGEMENT AND RISK MITIGATION**

<b>16</b>	<b>RISK ASSESSMENT AND MITIGATION IN ASEPTIC PROCESSING</b>	<b>703</b>
	<i>James Agalloco and James Akers</i>	
	Introduction	703
	Safety and Sterility – Science Rather than Mythology	706
	Sterility, Probability and Acceptability	707
	In-Process Control in Aseptic Processing	
	– Environmental Monitoring	711
	Risk Assessment	718
	Risk Mitigation	720
	Conclusion	729
	References	730
	About the Author	732
<b>17</b>	<b>THE MISATTRIBUTION OF “HUMAN ERROR” IN PRODUCING STERILE PRODUCTS</b>	<b>733</b>
	<i>James Vesper</i>	
	The Problem of Human Error	734
	Models that Describe the Components of Human Error	736
	Examples of How Human Error Models Can be Used	741
	Reducing Errors and Their Impact	747
	Conclusion	752
	References	753
	About the Author	755

## **PART D: THE FUTURE OF ASEPTIC PROCESSING**

<b>18</b>	<b>EVALUATION AND IMPROVEMENT OF ASEPTIC PROCESSES: RISK AND ASEPTIC PROCESS IMPROVEMENT</b>	<b>759</b>
	<i>Hal Baseman, Chris M. Hanff and Mike Long</i>	
	Interventions	763
	IREM, an Intervention Risk Evaluation Method	767
	IREM Principal Approaches	770
	IREM Examples	771

	Lessons Learned Part 1	787
	Lessons Learned Part 2 Supplemental Approach	788
	Conclusion	798
	References	799
	About the Authors	802
<b>19</b>	<b>SINGLE-USE (DISPOSABLE) TECHNOLOGY</b>	<b>805</b>
	<i>A. Mark Trotter and Derek Pendlebury</i>	
	Introduction and History to Single Use Technology	805
	Single-Use Components and Designs	
	– Basic Devices and Systems	808
	Upstream and Downstream SUS and Applications	835
	Key Operational and Economic Market Drivers	857
	Validation and Qualification/Industry Standards	
	and Guidance	862
	Waste Management	876
	References	879
	About the Authors	885
<b>20</b>	<b>THE ROLE OF RAPID MICROBIOLOGICAL METHODS IN ASEPTIC PROCESSING</b>	<b>887</b>
	<i>Michael J. Miller</i>	
	Introduction	887
	Regulatory Enablers	889
	Rapid Microbiological Methods	894
	Applications for Aseptically Manufactured Drug Product	896
	A Vision for the Future of Aseptic Processing Microbiology	896
	Summary	908
	References	908
	About the Author	911
