# CONTENTS

<b>I</b>	<b>THE USE OF RISK MANAGEMENT IN ENVIRONMENTAL MONITORING</b>	<b>I</b>
	<i>Karen Ginsbury</i>	
	Points to Address — FDA Aseptic Processing Guide	5
	Points to Address — EU Annex I	5
	Case Study #1 — Informal Risk Assessment for an Aseptic Processing Operation	7
	Case Study #2 — HACCP Analysis for an Aseptic Processing Operation	9
	Case Study #3 — FMEA Analysis for a Non-Sterile Process	16
	References	22
	About the Author	22
<b>2</b>	<b>ENVIRONMENTAL MONITORING: A PRACTICAL APPROACH</b>	<b>23</b>
	<i>Tim Sandle</i>	
	Introduction	23
	Cleanroom Environments	25
	Sources of Microbial Contamination	25
	The Environmental Monitoring Program	27
	Monitoring methods	28
	Viable monitoring	28

Active air samples	29
Settle plates	29
Surface samples — contact plates and swabs	30
Personnel samples	31
Particle monitoring	31
Locations for viable monitoring	32
Sampling responsibilities	34
Frequency of monitoring	34
Room conditions for monitoring	35
Duration of monitoring	36
Culture media	36
Incubation of test samples	38
Reading samples	38
Alert and action levels	38
Trending microorganisms	39
Investigating microbiological data deviations	40
Trend analysis	43
Environmental monitoring documentation	44
Summary	45
References	45
About the Author	48
<b>3 ENVIRONMENTAL MONITORING OF MICROBIOLOGY LABORATORIES</b>	<b>49</b>
<i>Frank Settineri</i>	
Introduction	49
Training	50
Laboratory Design and Flow	52
Sample receipt area	53
Sample staging and holding area	54
Biohazard waste area	54
Media preparation areas	55
General testing area	55
Live organism area (for identification, growth promotion, and culture preparation)	57
Cleanroom areas (suites or isolators) for sterility testing	57
Documentation	59
Standard Operating Procedures (SOPs)	59
Protocols	61
Reporting of data	62
Equipment, Utensils, Instruments, and Work Surfaces	64
Alert/Action Levels	67
Nonviable Particles	68
Contract Laboratories	68
Summary	69
References	69
About the Author	71

<b>4</b>	<b>DESIGNING AND VALIDATING A CONTAMINATION CONTROL PROGRAM</b>	<b>73</b>
	<i>Sandra A. Lowery and Maureen Mueller</i>	
	Introduction	73
	Contamination Control	74
	Sources of Contamination	75
	Controlled Environments and Facility Design	78
	Qualification of Classified Areas	81
	Barrier Systems	82
	Process Barrier	82
	Equipment/Material/Personnel Barriers	82
	Disinfection Program	83
	Disinfectant Qualification Studies	86
	Sterilization and Maintenance of Sterility	86
	Operator Training and Qualification	89
	Aseptic Technique	89
	Interventions	90
	Proper Cleanroom Behavior	90
	Working in Unidirectional Airflow	91
	cGMPs of Contamination Control	92
	Aseptic Operator Qualification Curriculum	92
	Controlled Area and Aseptic Gowning	94
	Controlled Area Gowning	94
	Aseptic Gowning	94
	Process Simulation Studies (Media Fills)	97
	Introduction	97
	Sterile Bulk Process Simulations	98
	Principles of Challenge: Aseptic Filling and/or Bulk Processing	99
	Additional Measurement Programs: Environmental and Personnel Monitoring	117
	Sterility Testing	120
	Bioburden and Endotoxin Burden Program	121
	Data Trending and Analysis	123
	Correlation of Assessments/Annual Product Reviews	123
	Conclusion	124
	References	124
	Additional Reading	125
	About the Authors	126
<b>5</b>	<b>ENVIRONMENTAL MONITORING AND THE MICROBIAL CONTROL STRATEGY</b>	<b>127</b>
	<i>Karen Ginsbury</i>	
	References	143
	About the Author	144

<b>6</b>	<b>DEVELOPING AN ENVIRONMENTAL MONITORING PROGRAM</b>	<b>145</b>
	<i>Barry A. Friedman</i>	
	Introduction and Background	145
	Regulatory requirements	145
	The manufacturing facility	146
	Key Considerations in the Development of an Environmental Monitoring Plan	147
	Airborne Viable and Non-viable Particulates	147
	Airborne viable particulates	147
	Airborne non-viable particulates	148
	Equipment for Cleanroom Monitoring	149
	Airborne viable particulate monitors	149
	Airborne non-viable particulate monitors	150
	Equipment monitoring	150
	Personnel monitoring	151
	Media considerations	151
	Water considerations	152
	Microbiological Control Within an ISO Class 5 Cleanroom	156
	Microbiological considerations	156
	Frequency of Testing within a Cleanroom	158
	Development of an environmental monitoring program	158
	FDA vs. EU considerations	159
	Continuous vs. non-continuous monitoring	159
	Benefits of continuous monitoring	160
	Monitoring Frequency Following Planned and Unplanned Shutdowns	160
	General	160
	Unplanned shutdowns	160
	Planned shutdowns	161
	Identification of Microorganisms Isolated from a Cleanroom Environment	161
	Background	161
	Available microbiological identification methods	162
	FDA considerations	163
	Data Analyses	163
	Microbial analyses of cleanroom data	163
	Management of data obtained from microbiological identification	164
	Microbial identification within classified areas	164
	Airborne particulate trending	165
	Alert and action levels	165
	Data utility in determining OOS events	166
	References	166
	About the Author	167
