

Technical Report No. 87

Current Best Practices for Pharmaceutical Glass Vial Handling and Processing

Authors

Roger Asselta, Genesis Packaging Technologies
Bettine Boltres, SCHOTT AG, Germany
Alfred Breunig, Nipro PharmaPackaging Germany GmbH
Nicholas R. DeBello, DeBello & Associates LLC
Carol Rea Flynn, Corning Incorporated
Linda Lesh, Nipro PharmaPackaging Americas
James McFarland, Gerresheimer Glass, Inc.
Anthony Perry, SCHOTT AG
Tina Tubbs, Sanofi Pasteur
Dawn Watson, Merck & Co., Inc.

Contributors

Dave Machak, American Glass Research
Jim Nadlonek, Integrated Project Services, LLC (retired)
Joseph Norris, Smart Skin Technologies
Wendy Sunderland, Amicus Therapeutics

Current Best Practices for Pharmaceutical Glass Vial Handling and Processing

Technical Report No. 87

ISBN: 978-1-945584-29-9

Table of Contents

1.0 INTRODUCTION	1	5.11.3 Automated Inspection	23
1.1 Purpose and Scope	1	5.11.4 Inspected Vial Ejects	23
2.0 GLOSSARY AND ABBREVIATIONS.....	2	5.11.5 Points to Consider	24
2.1 Abbreviations	3	5.12 Off-Loading	24
3.0 BEST PRACTICES FOR HANDLING GLASS VIALS ..	3	5.13 Vial Labeling	24
3.1 New Equipment Design, Installation, and Qualification.....	5	5.14 Secondary Packaging	25
3.2 Considerations of Component Design and Variation	6	5.14.1 Points to Consider	25
3.3 Real-Time Stress Monitoring	6	5.15 Finished Product Storage and Handling	25
4.0 RISK ASSESSMENTS	7	6.0 CONSIDERATIONS FOR PREVENTING ADDITIONAL DAMAGE	25
5.0 GLASS VIAL HANDLING PROCESS.....	10	6.1 Ready-to-Use Vials	25
5.1 Packaging for Transport and Storage.....	11	6.2 Robotic Automation	25
5.2 Integrated Line with Multiple Transfer Points... 11		6.3 Outer Surface Treatments or Coatings.....	26
5.2.1 Accumulators	12	7.0 REFERENCES.....	27
5.3 Vial Washing	13	8.0 APPENDIX I: FUNDAMENTALS OF GLASS SCIENCE	27
5.3.1 Washing Machines.....	13	8.1 Coefficient of Thermal Expansion	28
5.4 Dry Heat Sterilization and Depyrogenation	14	8.2 Stress Inside the Glass	29
5.4.1 Continuous Convection Tunnel	15	8.2.1 Melting and Solidification Behavior of Glass	29
5.4.2 Points to Consider	16	8.2.2 Physical Definition of Stress	29
5.4.3 Batch Depyrogenation Oven	16	8.3 Mechanical Strength of Glass	32
5.5 Vial Filling	17	8.3.1 Ductile versus Brittle Materials	32
5.5.1 Impacts.....	17	8.3.2 Practical Strength	32
5.5.2 Points to Consider	17	8.3.3 Tensile and Compressive Stress	33
5.6 Stopper Placement.....	17	8.3.4 Surface Condition and its Impact on Practical Strength	34
5.7 Lyophilization.....	17	8.4 Adsorption Layer on the Glass	35
5.7.1 Loading and Unloading	18	8.5 Chemical Strengthening.....	35
5.7.2 Lyophilization Process Concerns.....	18	8.6 References for Appendix I.....	35
5.7.3 Seating the Stopper	18	9.0 APPENDIX II: INVESTIGATIONS	36
5.7.4 Points to Consider	20	9.1 Initial Investigation	36
5.8 Capping.....	20	9.2 Root Cause Analysis.....	37
5.8.1 Impacts.....	20	9.3 Corrective and Preventive Actions	38
5.8.2 Points to Consider	20	9.4 References for Appendix II.....	38
5.9 Terminal Sterilization	22	10.0 APPENDIX III: GLASS BREAKAGE INVESTIGATION WORKSHEET AND CHECKLIST	39
5.10 External Washing	22		
5.11 Inspection	23		
5.11.1 Manual Inspection	23		
5.11.2 Semi-Automated Inspection	23		

FIGURES AND TABLES INDEX

Table 3.0-1	General Glass Handling Considerations..	4	Figure 5.11.1-1	Manual Inspection Hood	23
Figure 3.1-1	Screw Feed, Star Wheel, and Potential Pinch Points.....	6	Figure 5.11.3-1	Automated Inspection System.....	24
Figure 3.3-1	Example of a Vial Diagnostic Drone and Associated Data Visualization Technology	6	Figure 6.1-1	Ready-to-Use Vial System.....	26
Table 4.0-1	Typical Risk Management Tools	8	Table 8.0-1	Overview of Glasses Used in Pharmaceutical Primary Packaging by Classification and Standards	28
Table 4.0-2	Example of Risk Priority Number (RPN) Factor Determination.....	9	Figure 8.1-1	Comparison of Different Glass Types and Wall Thicknesses.....	29
Figure 5.0-1	Generic Glass Vial Handling Process	10	Figure 8.2.1-1	Volume-Temperature Diagram of a Crystal and of Glass.....	30
Figure 5.2.1-1	Example of a Rotary Accumulation Table.....	12	Figure 8.2.2-1	Tensile and Compressive Force Schematic.....	30
Figure 5.2.1.1-1	Abrasion rings	13	Figure 8.2.2.1-1	Schematic Representation of Heating and Forming of a Glass Tube into a Vial	31
Figure 5.3.1-1	Diving Nozzle Rotary Washing Machine.	14	Figure 8.2.2.1-2	Polarized Light Image of Annealed, Partially Annealed, and Not Annealed Vials.....	31
Figure 5.4-1	Stuck Marks	15	Figure 8.3.2-1	Stress intensity Factor (K) According to Griffith Theory	33
Figure 5.4.1-1	Typical Depyrogenation Tunnel Layout with a Preheat Zone, a Hot Zone, and a Cooling Zone.....	16	Figure 8.3.3-1	Vial with Compressive and Tensile Stress Areas	33
Figure 5.7.2-1	Vial Fracture Due to Expansion of a Product Component.....	19	Figure 8.3.4-1	Example of Decreasing Glass Practical Strength by Surface Flaws Induced through Pharmaceutical Processing	34
Figure 5.7.2-2	Lensed Vial Due to Expansion of a Product Component.....	19	Figure 8.4-1	Visualization of the Reaction of Water Vapor from Humidity and the Glass Surface	34
Figure 5.7.3-1	Hydraulic Ram for Stoppering Lyophilized Vials	19			
Figure 5.8-1	Capping Loads	21			
Figure 5.8.1-1	Examples of Vial Variability from PDA TR 43.....	21			
Figure 5.8.1-2	Examples of Surface Damage and Breakage Due to Contact with Sealing Disc or Rail	22
