

# PRACTICAL ASEPTIC PROCESSING: FILL AND FINISH VOLUME 2

---

## CONTENTS

<b>Preface</b>	<i>Irving J. Pflug</i>	<b>xi</b>
<b>Introduction</b>	<i>Jack Lysfjord</i>	<b>xv</b>
<b>Acknowledgements</b>		<b>xvii</b>
<b>Dedication</b>		<b>xix</b>
<b>Glossary</b>		<b>xxi</b>
 <b>Part Two: Current Aseptic Processing Techniques</b>		
<b>18</b>	<b>Quality Systems</b>	<b>3</b>
	<i>Anders Vinther and Mary Beth Grace</i>	
	What is a Quality System?	3
	GMP Compliance	4
	Risk-based GMPs	5
	ICH Q8 Pharmaceutical Development	7
	ICH Q9 Quality Risk Management	11
		<b>iii</b>

<b>iv</b>	<i>Practical Aseptic Processing: Fill and Finish</i>	
	ICH Q10 Pharmaceutical Quality System	14
	Implementation of a Quality System	20
	Special Considerations for PQS Related to Aseptic Processing	21
	References	28
	About the Authors	29
<b>19</b>	<b>Introduction to GAMP® 5</b>	<b>31</b>
	<i>Tony Margetts</i>	
	GAMP® 5 Key Concepts	33
	Terminology	34
	Extended Scope and Application	34
	Focusing on Patient Risk	35
	GAMP® 5 Life Cycle	37
	Annex 1: Overview of GAMP® Documentation Structure	38
	References	39
	About the Author	40
<b>20</b>	<b>GAMP® 5 Applied to Medical Devices</b>	<b>41</b>
	<i>Tony Margetts</i>	
	Introduction	41
	Definitions	41
	A Quality Systems Approach	42
	GAMP Approach to Procedures	42
	Responsibility, Accountability, and Communications	43
	Essential Requirements for Medical Devices Incorporating Electronic Programmable Systems	45
	Conclusions	46
	References	46
	About the Author	47
<b>21</b>	<b>Aseptic Process Validation and Aseptic Process Simulation Studies</b>	<b>49</b>
	<i>Hal Baseman</i>	
	Process Validation	49
	Validation of the Aseptic Process	50
	Validation and the Assurance of Product Quality	52
	Risk Management	53
	The Validation Program	55
	Planning	55

	Design Control	56
	Equipment Qualification	57
	Aseptic Process Validation Approach	59
	Aseptic Process Simulations	59
	Elements of the APS	61
	Preparation	62
	APS Prerequisites	62
	Designing the APS Study	63
	APS Study Design Considerations	64
	Other Considerations	76
	On-going Process Evaluation and Assessment	77
	References	78
	About the Author	79
<b>22</b>	<b>Sterility Test Isolators</b>	<b>81</b>
	<i>Patrice Cloué and Carmen Wagner</i>	
	Introduction	81
	Isolators for the Quality Control Microbiology Laboratory (QCML)	81
	Isolator Concept	96
	Isolator Systems	124
	Isolator Management and Maintenance	132
	Regulatory Compliance and Key Isolator Requirements	151
	What the Isolator Future Might Bring ...	162
	Conclusion	165
	References	166
	About the Authors	167
<b>23</b>	<b>Rapid Microbiological Methods in Support of Aseptic Processing</b>	<b>169</b>
	<i>Michael Miller</i>	
	Introduction	169
	The Desired State of Pharmaceutical Manufacturing	171
	Encouragement from the Pharmacopeias	174
	Applications and Opportunities	175
	Technology Platforms	177
	Summary and Closing Remarks	187
	Attachment I. Overview of PDA and Compendial Guidance	188
	References	215
	About the Author	219

### Part Three: Advanced Aseptic Processing Techniques

<b>24</b>	<b>Improving Process Quality of Pharmaceutical Liquids — Aseptic Blow/Fill/Seal Technology vs. Traditional Aseptic Processing</b>	<b>223</b>
	<i>Chuck Reed</i>	
	The Blow/Fill/Seal Process	225
	Traditional Aseptic Processing and Sterility of Pharmaceutical Liquids	227
	Personnel Intervention in Traditional Aseptic Critical Areas	228
	Advanced Blow/Fill/Seal Aseptic Technology	229
	Microbial and Particulate Integrity in the Aseptic Blow/Fill/Seal System	230
	The Case for Plastic vs. Glass Containers	232
	Flexibility with Changeovers Allows Shorter Runs, Increased Uptime, Maximized Throughput	234
	Insertion Technology	235
	Machine Design and Engineering	237
	The B/F/S Operating Environment	237
	Secondary Operations	238
	Recent Technical Advances	240
	The Future of B/F/S — An Aseptic Technology Destined to Prevail	242
	A Comment on the “Imposters”	243
	Additional Topics for Further Research	243
	References	244
	About the Author	246
<b>25</b>	<b>Isolators for Aseptic Manufacture of Parenterals</b>	<b>247</b>
	<i>Jack Lysfjord</i>	
	Introduction	247
	History	248
	Aseptic Pharmaceutical Manufacturing	249
	Barrier Isolators for Fill Finish Equipment	257
	Equipment Design Issues	258
	Isolator Design Issues	259
	The Future	270
	References	271
	About the Author	272

<b>26</b>	<b>Restricted Access Barrier Systems (RABS) and the Application for Aseptic Processing</b>	<b>273</b>
	<i>Jack Lysfjord</i>	
	Introduction	273
	History	273
	Evolution	275
	RABS Advantages/Disadvantages	282
	Design Issues	283
	Regulatory Issues	284
	ISPE RABS Definition	285
	Additional Considerations for RABS — A Summary	288
	Today	289
	RABS Current Status — Survey Data	289
	Future	290
	References	291
	About the Author	293
<b>27</b>	<b>Container and Component Transfer Methods</b>	<b>295</b>
	<i>Johannes Rauschnabel</i>	
	Introduction	295
	Transfer of Glass Containers	295
	Transfer of Thermally Unstable Containers	296
	Transfer of Nested Syringes	297
	Transfer of Thermally Stable Components	300
	Transfer of Thermally Unstable Components	303
	Transfer of Finished Products and Sampling Ports	304
	References	305
	About the Author	305
<b>28</b>	<b>Gloves and Glove Testing in Aseptic Processing</b>	<b>307</b>
	<i>Johannes Rauschnabel</i>	
	Introduction	307
	Gloves and Barrier Applications	309
	Integrity Testing	310
	Practical Aspects of Glove Handling	316
	References	318
	About the Author	319

<b>29</b>	<b>Containment — Protecting People, Product, and the Environment</b>	<b>321</b>
	<i>James P. Wood and Justin Farrell</i>	
	Broad View from Industry	321
	Focusing in on the Pharmaceutical and Health-Related Industries	322
	Engineering Controls	324
	Containment Topics Specific to Aseptic Processing	332
	Unit Operations	335
	Other Industry Trends	340
	References	342
	About the Authors	342
<b>30</b>	<b>Innovation in Aseptic Processing — Case Study Through the Development of a New Technology</b>	<b>345</b>
	<i>Benoît Verjans and Jacques Thilly</i>	
	Introduction	345
	The Closed Vial Concept	347
	Technical Aspects of Vial Manufacturing	349
	Technical Aspects of Vial Filling	351
	Validation of the Concept as Pharmaceutical System	354
	How Does the Concept Meet Initial Expectations?	355
	References	360
	About the Authors	360

## **Part Four: Current Aseptic Clinical Trial Materials**

<b>31</b>	<b>Secondary Aseptic Processing for Clinical Trial Materials</b>	<b>363</b>
	<i>Alisa Wright</i>	
	Overview	363
	Business	366
	Regulations	367
	Sourcing	367
	Planning	368
	Manufacturing	368
	Future Considerations	372
	References	372
	About the Author	373

**Part Five: Pharmacy Compounded Aseptic Products**

<b>32</b>	<b>Compounded Sterile Preparations at Hospitals</b>	<b>377</b>
	<i>Philip J. Schneider and E. Clyde Buchanan</i>	
	Introduction	377
	Quality Assurance in Compounding Sterile Preparations	379
	Components	379
	Facilities	381
	Environmental Control	383
	Compounding Personnel	386
	Packaging and Labeling	390
	Verification of Compounding Accuracy and Sterility	391
	Storage and Beyond Use Dating	392
	Maintaining Quality After the Preparation Leaves the Pharmacy	393
	Standard Operating Procedures	393
	Summary	394
	References	395
	About the Authors	397
<b>33</b>	<b>Pharmacy Aseptic Compounding of Parenteral Products</b>	<b>399</b>
	<i>Michelle Moore and Hank Rahe</i>	
	Isolator Physical Structure	401
	Air Handling System	402
	Personnel Interaction	403
	Material Transfers	404
	Attributes of Pharmacy Isolators	405
	Materials of Construction	405
	Design of Transfer Chamber	406
	Summary	409
	References	409
	About the Authors	410
	<b>Index</b>	<b>411</b>
