CONTENTS

Table of Contents	iii
Preface	xiii
Introduction	xv
CHAPTER 1: SIMPLIFYING VARIABILITY	1
<i>Davis Balestracci</i>	
Introduction	1
Data 'Sanity': Statistical Thinking Applied to Everyday Data	1
A Key Concept: Process-Oriented Thinking	3
The Use of Data is also a Process	4
Measurement	4
Collection	5
Analysis	6
Interpretation	6
A High Level Summary of Improvement: Six Sources of Problems with a Process	8
More Data 'Sanity'-Statistics and Reality	8
Research <i>versus</i> Improvement	8

Unknown and Unknowable	9
A Drug Declared as Beneficial: So...What Changes?	10
Further Clarification: 'Enumerative' Statistics <i>versus</i> 'Analytic' Statistics	11
'Statistics' in a Quality Improvement Perspective	12
The Very Basics of Process-Oriented Statistics	12
Old Habits Die Hard	13
Let's See...Have We Used All The Potential Jargon?	15
No Difference?!...	16
More on 'Plotting the Dots' - Common and Special Causes	18
The Quality Improvement Goal	20
Run Charts	21
So...Does 'Common Cause' Mean We Have To Live With It?	23
Think of a 'Rejected Batch' as an Undesirable Situation that was Unsuccessfully Avoided!	24
Summary	24
References	25
About the Author	26
CHAPTER 2: PEOPLE, TRAINING AND VARIABILITY	27
<i>Anne Marie Dixon</i>	
Background	27
Culture	28
Workplace Illiteracy	29
Establishment of a Training Program	30

Certification	33
Training Trainers	34
Adult Education	36
Summary	39
About the Author	40

CHAPTER 3: VARIABILITY IN MANUFACTURING 41

Vincent Sebald

Introduction	41
Process Development Environment	42
Culture and Organization	42
Measurement Systems	43
Gauge R&R Study	44
Support of Development Environment	48
Product Life Cycle	49
Formulation Development	49
Process Development (Lab Scale)	50
Screening Study	51
Process Scale-Up (Pilot Scale)	52
Process Optimization	55
Process Capability Study	56
Commercial Process Scale-Up	59
Process Validation	60
Commercial Manufacturing	60

Clinical Trial Impact	61
Recognizing Variability in Manufacturing	62
Statistical Process Control	63
Understanding the Variability – Determining the Root Cause	67
Team Approach	68
Problem Identification	69
Sequence Diagram	70
Identification of Potential Root Cause(s)	70
Fault Tree Analysis	71
Fish Bone Diagram	71
Causal Factor Tree	72
Failure Modes and Effects Analysis (FMEA)	73
Kepner-Tregoe	73
Evaluation of Identified Potential Root Cause(s)	74
Confirm the Actual Cause	74
Failures Which Can Be Confused with Increased Process Variability	74
Specification Determined by Limited Process Capability Data	75
Process Not in Control or Not Capable	75
Contributors to Process Variability	76
Production Operations	76
Raw Material Preparation	77
Compounding/Processing	77
Component Preparation	77
Delivery System Preparation	78

Sterilization	78
Packaging	78
Storage	78
Analytical Testing	79
Equipment (Design/Maintenance/Calibration)	79
Equipment Design	80
Maintenance	80
Calibration	81
Personnel	82
Shutdown/Restart	83
Fear Factor	83
Challenges in Addressing Manufacturing Variability Issues	84
Management of Process Variability	84
Variation Reduction	84
Mistake Proofing	85
In-Process Testing	85
Statistical Process Improvement	86
Process Analytical Technologies	86
Software	86
Pareto Charts	87
Component Swapping Study	87
Process Controls (Automation)	88
Summary	88
Acknowledgements	89

References	89
About the Author	90
CHAPTER 4: VARIABILITY IN QUALITY SYSTEM MANAGEMENT	91
<i>Steve Kuwahara</i>	
Suitability for an Intended Use	91
Suitability is Dependent on the Customer	92
Development of Specifications	92
Quality is Meeting Specifications	93
Quality is Expensive	94
Quality is Fitness for Use	95
Whose Intended Use?	95
Variability	95
Taguchi Loss Function	96
Toleration of Deviation	96
Combination of Events	98
Useless Specifications	98
Quality as a Result of Design	99
Early Specifications	99
Specifications	100
Two Factors Related to Specifications	100
Quantitative Values	100
Variation in Processes	101
How Many Standard Deviations?	102

Six Sigma Range	103
High Variability and Regulatory Requirements	104
Standard Practices	104
Meeting Specifications	105
Stable and Capable Processes	105
Need for Stable and Capable Process	106
Quality Practices and the Control of Variability	106
Quality Standards (CGMP, QSR, ISO, ASTM)	107
Personnel and Training	108
Equipment Qualification, Calibration and Maintenance	109
Document and Change Control	110
Corrective and Preventive Actions (CAPA) and Continuous Improvement	112
Quality Audits	114
Management	114
References	115
About the Author	116

CHAPTER 5: VARIABILITY IN THE QC LABORATORY **117**

Diane Petitti

Major Sources of Laboratory Variability	117
Method Attributes	118
Composition of Test Sample Matrix	119
Reference Standards	120
Equipment	121

Facilities	121
Evaluation of the Analytical Result	122
Analyst	124
Conclusion	126
About the Author	126
Disclaimer	127
CHAPTER 6: VARIABILITY IN SUPPLY CHAIN MANAGEMENT	129
<i>Paul Seaback</i>	
Overview	129
Content	130
Planning and Procurement	130
Distribution	132
Transportation	136
Pedigree	146
About the Author	149
CHAPTER 7: VARIABILITY IN NON-MANUFACTURING FUNCTIONS	151
<i>Eileen Morrissey</i>	
What is Variation in a Non-Manufacturing Environment?	152
Variation in Administrative Processes	153
Financial Process Variability	154
Human Resource Process Variability	156
Information Technology Process Variability	158

Sales and Marketing Process Variability	159
Product Development Process Variability	163
About the Author	170
CHAPTER 8: GMP AND VARIABILITY	171
<i>Michael H. Anisfeld</i>	
Introduction	172
Drug Quality – Pharmacopoeal Testing	172
The Advent of GMPs	174
GMPs: Codes, Directives, Guidelines, Points to Consider, or Regulations; and Inspection Severity	176
Drug Quality – GMP Implementation	179
The GMPs	185
Quality Management and the Qualified Person	187
Validation	189
Self-Inspection	190
Contract Manufacture and Contract Analysis	191
Future Trends – GMPs and Risk Assessment	192
Afterthought	194
About the Author	195
Index	197
