

ENVIRONMENTAL MONITORING

A COMPREHENSIVE HANDBOOK

VOLUME 2

Jeanne Moldenhauer
Editor

CONTENTS

| | |
|-----------------------|------|
| About the Authors | xvii |
| List of Abbreviations | xxv |

PART 3 – ONGOING MONITORING, SURVEILLANCE AND EVALUATION

CHAPTER 1: ESTABLISHING ONGOING MONITORING, SURVEILLANCE AND EVALUATION PROGRAMS

| | |
|---|----------|
| <i>Jeanne Moldenhauer</i> | 3 |
| Introduction | 3 |
| Components of these Systems | 3 |
| Cleaning and Sanitization/Disinfection | 4 |
| Sample Site Selection | 4 |
| Sampling Frequency | 6 |
| Alert and Action Levels | 6 |
| Data Management | 7 |
| Data Collection | 7 |
| Analysis of Data | 8 |
| Approach to Data Management | 8 |
| Interpretation of Data | 9 |
| Identification/Characterization of Isolates | 9 |
| Investigations and Corrective Actions | 10 |
| Documentation Methods | 10 |
| Environmental Monitoring for Terminal Sterilization Processes | 11 |
| Environmental Monitoring for Aseptic Processes | 11 |
| Environmental Monitoring and Isolation Technology | 11 |

| | |
|---|----|
| Water Monitoring | 12 |
| Monitoring of Compresses Gases | 12 |
| Air Monitoring | 13 |
| Non-Viable Particulate Monitoring | 13 |
| Viable Monitoring | 13 |
| Surface Monitoring | 14 |
| Personnel Monitoring | 14 |
| Monitoring Product or Component Bioburden | 14 |
| Parametric Release and Bioburden | 15 |
| In-Process Testing | 15 |
| Environmental Monitoring During Routine Sterility Testing | 16 |

CHAPTER 2: ESTABLISHING ALERT AND ACTION LEVELS: THE ANALYSIS OF ENVIRONMENTAL MONITORING DATA

| | |
|-------------------|----|
| <i>Tom Genova</i> | 17 |
|-------------------|----|

| | |
|-----------------------------|----|
| Introduction | 17 |
| Contamination Process | 17 |
| Alert and Action Levels | 19 |
| Statistical Tools | 20 |
| Data Sets | 21 |
| Mean and Standard Deviation | 21 |
| Percentiles | 23 |
| Probability Charts | 24 |
| Control Charts | 25 |
| Control Charts: Individuals | 26 |
| Control Charts: c-Chart | 27 |
| Control Charts: Modified | 30 |
| Summary | 32 |
| Acknowledgements | 32 |
| References | 32 |

CHAPTER 3: TRENDING DATA

| | |
|--------------------|----|
| <i>Jim Radigan</i> | 33 |
|--------------------|----|

| | |
|--|----|
| Introduction | 33 |
| What is Trending? | 34 |
| Why Do We Trend? | 34 |
| FDA's Expectations of Trending | 35 |
| How many Data Points are Required to Identify a Trend? | 36 |
| Trends Versus Normal Variability | 38 |

| | |
|---|-----------|
| Trending Environmental Data | 40 |
| Other Considerations | 44 |
| References | 45 |
| CHAPTER 4: REPORTING DATA | |
| <i>Jeanne Moldenhauer</i> | 47 |
| Introduction | 47 |
| Types of Reports Generated | 47 |
| Selecting a Report Format/Style | 48 |
| General Comments on Reports | 50 |
| Accuracy | 50 |
| Traceable | 50 |
| Timely | 50 |
| Well-Documented | 50 |
| Bibliography | 51 |
| CHAPTER 5: USING ENVIRONMENTAL MONITORING DATA TO SUPPORT STEAM STERILIZATION PROCESS VALIDATION | |
| <i>Jeanne Moldenhauer and Michael S. Korczynski</i> | 53 |
| Introduction | 53 |
| Bacterial Spores and Sterilization Cycles | 53 |
| Spore Forming Microorganisms in the Environment | 54 |
| Important Definitions and Concepts | 54 |
| Exposure Time or Dwell Time | 55 |
| Exposure or Dwell Temperature | 55 |
| Moist Heat Sterilization Resistance | 55 |
| D-Value (Decimal Reduction Time) | 55 |
| The Thermal-Death-Time or Thermal Resistance Curve | 56 |
| z-Value | 57 |
| z-Value (Temperature Coefficient) | 58 |
| F-Value (Lethal Rate) | 58 |
| Calculating FT-Values | 59 |
| Lethal Rate | 59 |
| Time-Temperature Data | 60 |
| F ₀ -Value | 60 |
| The Survivor Curve Method | 62 |
| Fraction Negative Method | 63 |
| Sterilization Process Models | 63 |
| Overkill Models | 66 |
| Combined BI/Bioburden-Based Models | 68 |
| Absolute Bioburden Models | 70 |

| | |
|--|----|
| Spore Bioburden | 71 |
| Heat Screening | 71 |
| Aseptic Processing Followed by Terminal Sterilization | 72 |
| Ongoing Bioburden Characterization | 73 |
| Bioburden/Biological Indicator and Bioburden Approaches | 73 |
| Type of Carrier or Suspending Media | 73 |
| The General Method of Evaluating Heat Processes | 74 |
| Thermal Resistance Curve to Lethal Rates (L) | 74 |
| Determining the F_0 -Value ($F_{121.1C}$) (Equivalent Minutes at the Reference Temperature of 121.1°C, 250°F) of a Steam Sterilization Process | 76 |
| Calculation of Process Lethality | 77 |
| Integration of Lethal Rates | 78 |
| Time at Temperature | 78 |
| Sterilization at Temperatures Other than 121°C (250°F) | 78 |
| D-Value Determination for Performance Qualification | 79 |
| Overkill Approach | 79 |
| Bioburden/Biological Indicator and Bioburden Approaches | 79 |
| Biological Indicators | 79 |
| Purpose of Bioindicators | 80 |
| Selection of Biological Indicators | 81 |
| Enumeration of Biological Indicators | 82 |
| Thermal Resistance of Biological Indicators | 82 |
| Verification of the Resistance of Commercial Indicators | 83 |
| Use of Biological Indicators in Qualification Studies | 84 |
| Substrate Selection | 84 |
| Bibliography | 84 |

CHAPTER 6: ENVIRONMENTAL MONITORING FOR STERILIZATION PROCESS DEVELOPMENT

| | |
|--|-----|
| <i>Anne Booth</i> | 87 |
| Introduction | 87 |
| Standards and Guidance | 87 |
| Understanding the Sterilization Process | 89 |
| Sterility Assurance Levels (SAL) | 90 |
| Product Microbial Levels | 93 |
| First Step – Establish a Bioburden Testing Program | 96 |
| Second Step – Understand and Control Environmental Factors that Affect Product Bioburden | 99 |
| Third Step – Sterilization Process Development | 102 |
| Radiation | 102 |
| Ethylene Oxide | 106 |
| Case Studies | 108 |

| | |
|--|-----|
| Importance of Understanding Bioburden | 108 |
| Affect of Environment | 108 |
| References | 108 |
| CHAPTER 7: IDENTIFICATION OF ENVIRONMENTAL ISOLATES | |
| <i>Klaus Haberer</i> | 111 |
| Introduction | 111 |
| Regulatory Expectance | 113 |
| United States | 113 |
| Pharmacopoeial Position | 113 |
| Position of FDA | 113 |
| Position of the European Authorities | 114 |
| Position of International Organization for Standardization (ISO) | 114 |
| Position of Parenteral Drug Association (PDA) | 114 |
| A Simplified Picture of Microbial Taxonomy | 115 |
| Groups of Microorganisms | 115 |
| Gram-Positive Cocci | 116 |
| Spore Forming Gram-Positive Rods | 116 |
| Non Spore Forming Gram-Positive Rods | 117 |
| Oxidase Positive Gram-Negative Rods (Non-Fermenters) | 117 |
| Oxidase Negative Gram-Negative Rods (Fermenters) | 118 |
| Yeasts | 119 |
| Molds | 119 |
| Significance of Identification of Environmental Isolates for Cleanroom Control | 119 |
| Purpose of Identification | 119 |
| Identification of Gram-Positive Cocci | 121 |
| Identification of Spore Forming Gram-Positive Rods | 121 |
| Identification of Non-Spore Forming Gram-Positive Rods | 122 |
| Identification of Oxidase Positive Gram-Negative Rods | 122 |
| Identification of Oxidase Negative Gram-Negative Rods | 122 |
| Identification of Yeast and Mold | 123 |
| Present Industrial Practice | 123 |
| Sampling Practice | 123 |
| Identification Practice | 123 |
| Environmental Sampling and Characterization of the Microflora | 124 |
| Use of Identification Data | 125 |
| Composition of the Microflora in Manned Cleanrooms | 125 |
| A Proposed Identification Scheme for Environmental Monitoring | 128 |
| Critical and Direct Support Zone | 128 |
| Indirect Support Zone | 131 |
| Consequence of Application of the Proposed Identification Scheme | 131 |

| | |
|---|-----|
| A Model Cleanroom Monitoring System | 131 |
| Conventional Identification Scheme | 133 |
| Proposed Identification Scheme | 134 |
| Summary and Conclusions | 135 |
| References | 135 |
| CHAPTER 8: ENVIRONMENTAL MONITORING INVESTIGATIONS | |
| <i>Karen Ginsbury</i> | 137 |
| CHAPTER 9: CHANGE CONTROL AND PREVENTATIVE MAINTENANCE | |
| <i>Jeanne Moldenhauer</i> | 153 |
| Introduction | 153 |
| Change Control Procedures | 153 |
| Preventative Maintenance | 154 |
| Documentation of Maintenance Procedures | 154 |
| Conclusion | 154 |
| CHAPTER 10: ENVIRONMENTAL MONITORING AND CONTROL SYSTEM ASSESSMENT | |
| <i>Jeanne Moldenhauer</i> | 155 |
| Introduction | 155 |
| Components of an Environmental Control Program | 156 |
| What should be Included in an Environmental Assessment | 157 |
| Who should be Involved in the Assessment? | 158 |
| Achieving Sustainable Quality with the Environmental Program | 158 |
| Conclusion | 158 |
| CHAPTER 11: TYPICAL PROCEDURES REQUIRED FOR AN ENVIRONMENTAL CONTROL PROGRAM | |
| <i>Jeanne Moldenhauer</i> | 159 |
| Introduction | 159 |
| Microbiological Master Plan | 159 |
| Environmental Control Policy | 160 |
| Utilities (HVAC, Water, Compressed Gases) | 161 |
| Cleaning and Disinfection (of Facilities) | 162 |
| Equipment Cleaning (Production) | 163 |
| Equipment and Facility Cleaning (Laboratory) | 163 |
| Environmental Monitoring and Control | 164 |
| Conclusion | 169 |

CHAPTER 12: WHAT IS REQUIRED FOLLOWING RE-MODELING?*Jeanne Moldenhauer*

171

| | |
|---------------------------|-----|
| Introduction | 171 |
| Establishing Requirements | 171 |
| Selection of Sample Sites | 172 |
| Qualification of the Area | 172 |
| Final Report | 173 |

CHAPTER 13: AUTOMATING AN ENVIRONMENTAL CONTROL PROGRAM*Jeanne Moldenhauer*

175

| | |
|---|-----|
| Introduction | 175 |
| Approaches | 177 |
| System Assessment | 177 |
| Evaluate Opportunities for Automation | 178 |
| Manual Data Collection and/or Utilization of Spreadsheets | 178 |
| Laboratory Information Management Systems (LIMS) | 179 |
| Designing a Custom System | 179 |
| Off-the-Shelf Software, with some Customization Possible | 180 |
| Evaluating Vendors | 180 |
| Software Audits | 181 |
| Technical Support Available | 181 |
| Meeting of the Minds | 182 |
| Defining and Specifying Requirements | 182 |
| Software Selection | 182 |
| Installation of the Software | 182 |
| Debugging and Gaining Familiarity | 183 |
| Considerations for Validation Testing | 183 |
| Validation | 184 |
| Conclusions | 184 |
| References | 184 |

CHAPTER 14: ENVIRONMENTAL IMPACT ON MEDIA FILLS*John Lindsay*

187

| | |
|--------------------------------|-----|
| Summary | 187 |
| Course History – The Genesis | 188 |
| Course History – The Evolution | 188 |
| Facility Description | 190 |
| Materials and Methods | 192 |
| Spore Suspension | 192 |
| Facility Sanitization | 192 |
| Media Fills | 193 |

| | |
|---|-----|
| Environmental Monitoring | 193 |
| Incubation Conditions | 194 |
| Case Studies | 194 |
| Case Study No. 1 (May 2000) | 197 |
| Case Study No. 2 (August 2000) | 198 |
| Case Study No. 3 (January 2002) | 199 |
| Case Study No. 4 (March 2001) | 200 |
| Case Study No. 5 (October 2001) | 201 |
| Case Study No. 6 (April 2002) | 201 |
| Case Study No. 7 (January 2003) | 203 |
| Case Study No. 8 (September 2002) | 205 |
| Case Study No. 9 (October 2002) | 207 |
| Case Study No. 10 (August 2003) | 207 |
| Case Study No. 11 (August 2004) | 209 |
| Case Study No. 12 (October 2004) | 210 |
| Case Study No. 13 (September 2004) | 211 |
| Case Study No. 14 (November 2004) | 212 |
| Discussion – Media Fills | 212 |
| Discussion – The Experimental Plan | 213 |
| Discussion – What the Data does not Demonstrate | 214 |
| Discussion – Recommendations | 215 |
| Conclusions | 215 |
| Acknowledgements | 215 |

CHAPTER 15: ENVIRONMENTAL MONITORING IN NON-STERILE PRODUCT MANUFACTURING

| | |
|---------------------------|-----|
| <i>Anthony M. Cundell</i> | 217 |
|---------------------------|-----|

| | |
|--|-----|
| Introduction | 217 |
| Guidance Documents | 218 |
| Risk Assessment | 220 |
| Appropriate Levels of Environmental Control | 225 |
| Microbial Sampling Methods | 226 |
| Selection of Sampling Locations and the Frequency of Sampling | 226 |
| Setting Alert and Action Levels for Air and Surface Monitoring | 227 |
| Significance of Different Microbial Isolates | 228 |
| Responses to Environmental Monitoring Excursions | 229 |
| Overall Management of an Environmental Monitoring Program | 230 |
| Conclusions | 230 |
| References | 231 |

PART 4 - RAPID METHODS APPLIED TO ENVIRONMENTAL MONITORING**CHAPTER 16: INTRODUCTION TO RAPID MICROBIAL METHODS FOR ENVIRONMENTAL MONITORING***Jeanne Moldenhauer* **235**

| | |
|---|-----|
| Introduction | 235 |
| Resources for Rapid Microbiological Methods | 236 |

CHAPTER 17: RAPID METHODS FOR WATER MONITORING*Jeanne Moldenhauer* **239**

| | |
|--|-----|
| Introduction | 239 |
| Considerations for Selection of a Water Monitoring Instrument | 239 |
| Systems Available for Water Monitoring - Microbiology | 240 |
| ATP Bioluminescence | 241 |
| Biosensors | 241 |
| Confocal Laser Scanning Spectroscopy | 241 |
| Conventional Methods with Amplified or Computer-Aided Imaging to Detect Micro-Colonies | 241 |
| Electrical Sensors | 242 |
| Electrochemical Based Sensors | 242 |
| Electrochemical Immunodetection | 242 |
| Flow Cytometry | 242 |
| Handheld Endotoxin Analysis | 243 |
| Infrared Spectroscopy | 243 |
| MALDI-TOF Mass Spectroscopy | 243 |
| Microarrays (DNA Chips and Biochips) | 243 |
| Microfluidic Devices (Lab on a Chip) | 244 |
| Microlensing Technologies | 244 |
| Optical Sensors | 245 |
| Polymerase Chain Reaction (PCR) | 245 |
| Solid Phase Laser Scanning Cytometry | 246 |
| Conclusion | 247 |
| Acknowledgements | 247 |
| Bibliography | 247 |

CHAPTER 18: ENVIRONMENTAL MONITORING USING THE SCAN RDI POLYM'AIR*Jeanne Moldenhauer and Pascal Yvon* **249**

| | |
|-----------------------|-----|
| Introduction | 249 |
| What is the Scan RDI? | 249 |

| | |
|---|-----|
| Scan RDI Technology | 250 |
| Membrane Filtration | 250 |
| Labeling | 250 |
| Laser Scanning | 253 |
| Data Reports and Validation | 255 |
| Applications for Environmental Monitoring | 256 |
| Filterable Samples | 256 |
| Air and Surface Samples | 258 |
| References | 260 |

CHAPTER 19: RAPID ENVIRONMENTAL MONITORING USING THE GROWTH DIRECT™ TEST

| | |
|--------------------------|-----|
| <i>Don Straus et al.</i> | 261 |
|--------------------------|-----|

| | |
|--|-----|
| Rapid Methods for Environmental Monitoring | 261 |
| The Growth Direct™ Test – How it Works | 263 |
| Rapid Microbial Enumeration of Air Samples | 269 |
| Rapid Microbial Enumeration of Surface Samples | 272 |
| Identifying Environmental Isolates Detected by the Growth Direct™ Test | 276 |
| Conclusions | 277 |
| Methods | 278 |
| References | 279 |

CHAPTER 20: IDENTIFICATION SYSTEMS

| | |
|--|-----|
| <i>Jeanne Moldenhauer and Scott Sutton</i> | 281 |
|--|-----|

| | |
|---|-----|
| Abstract | 281 |
| Why are Identifications Performed? | 281 |
| Environmental Monitoring | 281 |
| Raw Material/In-Process Bioburden | 282 |
| Types of Identification/Characterization Methods | 283 |
| Traditional Methods Used for Microbial Identification | 283 |
| Stains | 286 |
| Biochemical Screening | 288 |
| Differential and Selective Media | 289 |
| Rapid/Alternative Methods of Microbial Identification | 289 |
| Phenotypic Methods | 289 |
| Genotypic (Nucleic Acid Methods) | 291 |
| Considerations in Selection of an Identification System | 293 |
| Conclusion | 294 |
| Acknowledgements | 294 |
| Bibliography | 294 |

CHAPTER 21: PALL SYSTEM*Lucia Ceresa***297**

| | |
|--|-----|
| Introduction to the Pall System | 297 |
| Pallchek™ ATP System Technology | 299 |
| Pallchek™ Luminometer | 299 |
| Pallchek™ Reagent Kits | 299 |
| Basic Testing Procedure | 301 |
| Background Control | 302 |
| Microbiological Environmental Control using ATP Rapid Technology | 303 |
| Sample Preparation and Analysis Qualification | 304 |
| Water Monitoring Application | 306 |
| Qualitative Analysis of Water Samples | 306 |
| Quantitative Analysis of Water Samples | 308 |
| Cleaning/Sanitization Control | 311 |
| Cleanroom and Isolator Monitoring Application | 314 |
| Viable Surface Monitoring | 314 |
| Viable Active Air Monitoring | 319 |
| Surface Monitoring of Controlled Areas | 319 |
| Bibliography | 320 |

CHAPTER 22: GLOSSARY*Jeanne Moldenhauer***323**

| | |
|-------------------|-----|
| Glossary of Terms | 323 |
|-------------------|-----|

CHAPTER 23: START-UP LIMITS FOR ENVIRONMENTAL MONITORING*Jeanne Moldenhauer***327**

| | |
|--|-----|
| Introduction | 327 |
| Guidelines of Current Typical Environmental Monitoring Frequencies and Levels – Sterile Products | 328 |
| Guidelines of Current Typical Environmental Monitoring Frequencies and Levels – Non-Sterile Products | 330 |
| Guidelines of Current Typical Environmental Monitoring Frequencies and Levels – Utilities | 331 |
| Acknowledgements | 333 |

CHAPTER 24: IMPLEMENTATION AND AUTOMATION OF THE MIMS SYSTEM

| | |
|--|------------|
| <i>George M. Levinson</i> | 335 |
| Implementation and Automation of an Environmental Monitoring Program | 335 |
| Abstract | 335 |
| Background | 336 |
| What is an Environmental Monitoring Program? | 337 |
| An Automated Environmental Monitoring System | 340 |
| Selecting a Software Program | 346 |
| The Decision to Purchase EM Software | 348 |
| Software Audits | 350 |
| Technical Support Available | 350 |
| Meeting of the Minds | 351 |
| Defining and Specifying Requirements | 351 |
| Installation of the Software | 352 |
| Debugging, Gaining Familiarity | 352 |
| Preliminary Training | 352 |
| Considerations for Validation Testing | 353 |
| Validation | 353 |
| Installation Testing | 353 |
| Operational Qualification (OQ) | 354 |
| Performance Qualification (PQ) | 354 |
| Conclusion | 354 |
| References | 355 |

CHAPTER 25: ACQUISITION AND IMPLEMENTATION OF AN ENVIRONMENTAL MONITORING SOFTWARE PROGRAM

| | |
|--|------------|
| <i>Susan Cleary and Parsa Famili</i> | 357 |
| Introduction | 357 |
| The Current State of the Lab | 357 |
| The Lab's Future State | 358 |
| Evaluate User Requirements and Design Specifications | 359 |
| Prepare Budget | 360 |
| Select a System | 362 |
| Vendor Audit | 362 |
| Performance Measures | 366 |
| Test System | 367 |
| Managing Risk | 368 |
| Personnel Training | 368 |
| System Validation | 369 |
| Gap Analysis | 371 |

| | |
|---|-----|
| Roll Out | 371 |
| Go Live | 372 |
| Ongoing Support | 372 |
| Initial Warranty | 372 |
| Yearly Service and Support Programs and Extended Warranty | 372 |
| Telephone Support Hot Line | 372 |
| On-site Technical Support | 372 |
| Maintenance | 373 |
| Back Up | 373 |
| Disaster Recovery | 373 |
| Archiving | 373 |
| Conclusion | 374 |

CHAPTER 26: AUTOMATING, MANAGING AND TRACKING INVESTIGATIONS

Jeanne Moldenhauer and James Radigan **375**

| | |
|--|-----|
| Introduction | 375 |
| Components of an Investigation | 376 |
| Investigation Tracking and Monitoring | 376 |
| Identifying Tasks to be Performed | 376 |
| Tracking Investigation Status | 376 |
| Generating an Investigation Summary Report | 377 |
| Effectiveness of Corrective Actions | 377 |
| Reporting Mechanisms | 378 |
| Sample Report List | 378 |
| References | 378 |

CHAPTER 27: COMPARATIVE MOLD AND YEAST RECOVERY ANALYSIS

Veronica Marshall, Sherie Poulson-Cook

and Jeanne Moldenhauer **387**

As published in the PDA Journal of Pharmaceutical Science and Technology, Vol. 52, No. 4/July-August 1998

CHAPTER 28: HEPA MOBILE STORAGE CARTS

Seth Pyers **393**

| | |
|--------------|-----|
| Introduction | 393 |
| Design | 393 |
| Validation | 397 |
| Conclusion | 399 |

| | |
|---|------------|
| Attachment 1 | 399 |
| Test Methods Checklist | 399 |
| Acceptance Criteria | 400 |
| CHAPTER 29: ENVIRONMENTAL MONITORING USING AN INSTANTANEOUS MICROBIAL DETECTOR | |
| <i>J. P. Jiang</i> | 403 |
| Functionality of the Instantaneous Microbial Detector (IMD) | 403 |
| Application of IMD Sensor in Air Monitoring | 407 |
| Summary | 411 |
| Acknowledgements | 412 |
| References | 412 |
| INDEX | 413 |
