

CONTENTS

Introduction

John Geigert ix

I. *Mycoplasma* Biology

A Brief Summary of *Mycoplasma* Biology, Ecology, Detection, and Elimination

Leonard Hayflick
Department of Anatomy, School of Medicine,
University of California 3

II. *Industry Experience with Mycoplasma Contaminations*

Mycoplasma Contamination in TSB Derived from Plant Peptones

Ivar Kljavin
Genentech, Inc. 41

Case Studies of *Mycoplasma* Contamination in CHO Cell Cultures

Houman Dehghani, Brian Rasmussen, Victor Fung,
Rob Piper, John Gosink, Bob Weaver, and Pranhitha Reddy
Amgen, Inc. 53

Mycoplasma Contamination: Challenges and Opportunities for the Biotechnology Industry

Cynthia E. Romero-Arroyo
Ortho Biologics 61

III. FDA Viewpoint

FDA Perspective on Mycoplasma Contaminations in Manufacturing Due to Use of Plant Peptones

Patricia Hughes
FDA/CDER, Office of Compliance,
Therapeutic Facility Review Branch 73

IV. Animal and Plant Peptones: Vendors Viewpoint on Control of Mycoplasma

Plant Peptone Manufacturing: Considerations for Minimizing Risk of Contamination by Adventitious Agents

Christopher Wilcox
Kerry Bio-Science 95

Associated Risks with TSB in Aseptic Processing Simulations

Marc Glogovsky
EMD 107

V. Mycoplasma Removal-Vendors Viewpoint

Mycoplasma Removal: Current Status and Future Trends

Suraj Baloda
Millipore Corporation 131

Performance Comparison of "0.1 Micron" Rated Filters Using Mycoplasma Challenges

Maik Jornitz and Holger Bromm
Sartorius 147

Qualification of 0.1 Micron Filters for Mycoplasma Removal
Jerold Martin
Pall Life Sciences 163

VI. *Mycoplasma Testing*

**Using Quantitative Polymerase Chain Reaction (Q-PCR)
for Mycoplasma Testing of Biopharmaceutical Products:
The HyMy™ Assay**
Audrey Chang
BioReliance Invitrogen Bioscience 191

Mycoplasma PCR Assay for Cell Culture Fluids
Barbara Potts
Genentech, Inc. 207

VII. *Questions & Answers*

Summary of the Workshop and Q&A Session 231
