
CONTENTS

Introduction	xi
I	
What is Microbiology and Why Do I Care?	I
Why Do I Care about Microbiology?	1
The Scope of Microbiology	2
Binomial Taxonomy	3
Metabolic Diversity	4
Environmental Diversity	5
Temperature	5
pH	6
Oxygen Availability	6
Available Water	7
Planktonic vs. Sessile	8
Sex	8
Life on Earth	9
Viruses	10
Prions	11
Eukaryote vs. Prokaryote	11
Fungi	12
Yeast	12
Mold	13
Bacteria	13
Differences Among the Bacteria	13
Spore Formation	15
References and Further Reading	16

2	Microbial Growth and Enumeration	19
	Microbial Growth	19
	Cell Division	19
	Phases of Growth in Culture	20
	Counting	21
	Counting in Broth Culture	21
	Counting CFU	23
	Variability	25
	Impact of Variability on Media Growth Promotion	25
	Agar Media	25
	Growth Promotion Testing of Broth Media	25
	Finished Product Tests	27
	Sterility Test	27
	Antimicrobial Efficacy Test (AET)	28
	Microbial Limits Tests	28
	Enumeration	28
	Absence of Specified Organisms	28
	Bacterial Endotoxins Test	29
	Antibiotic Testing	29
	Zone of Inhibition (ZOI) Test	29
	Minimum Inhibitory Concentration (MIC)	30
	In-Process Tests	30
	Bioburden and Environmental Monitoring	30
	References and Further Reading	31
3	Laboratory Design Concerns	33
	General Design Concerns	34
	Design Considerations for Specific Functions	37
	Type of Work Performed	37
	Environmental Monitoring/Process Simulation Support Lab	37
	In-process and Finished Product Testing Lab	38
	Microbial Identification Lab	39
	Media Kitchen	39
	Equipment Design Concerns	40
	Adequate Bench Space	40
	Adequate Refrigerator Space	40
	Adequate Incubator Space	41
	What is the Lab going to do?	41
	How often do you want to be able to clean the incubators?	42
	Adequate Autoclave Capacity	42
	Temperature Monitoring System	43
	Dedicated Emergency Circuits	43
	Safety Considerations	44

Physical Safety Considerations	44
Biosafety Considerations	44
References and Further Reading	45
4 Microbiology Laboratory Quality Control Practices	47
Introduction	47
Media Preparation and Quality Control	48
Media Preparation	48
Media QC Checks	50
Media Growth Promotion	50
Growth Promotion Testing of Agar Media	52
Growth Promotion Testing of Broth Media	53
Growth Promotion Recommendations	55
Media Storage	55
Reagent Storage	57
Maintenance of Microbial Cultures	57
Training of Personnel	60
Other Considerations	61
Laboratory Equipment	61
Documentation	61
Maintenance of Laboratory Records	62
References and Further Reading	62
5 Microbial Identification Methods	63
Introduction	63
Initial Isolation of Pure Colony	64
The Gram Stain	66
Other Methods	67
KOH String Test	67
Aminopeptidase Test	68
Fluorescent Stains	68
Cell Wall Assay	68
Gram Stain Summary	69
Phenotypic Methods	69
Preliminary Screening of Microbial Isolates	69
API Strips	70
Vitek 2 Compact	70
Biolog (Omnilog)	70
MIDI Sherlock FAME	71
Genotypic Methods	71
RiboPrinter	71

	MicroSeq	72
	Polymerase Chain Reaction (PCR) Technologies	73
	Bacterial Barcodes	73
	Polyphasic Identification	73
	Validation of Microbial Identification Methods	74
	The User Requirement Specification (URS)	74
	Installation Qualification (IQ)	75
	Operational Qualification (OQ)	76
	Performance Qualification (PQ)	77
	Final Comments on Identification Systems — The Importance of the Database	77
