

Table of Contents

1.0 INTRODUCTION	2	5.5 Toxicity/Biological Safety Testing.....	19
1.1 Purpose/Scope.....	2	5.6 Endotoxin and (1→3)-β-D-Glucan Content....	19
2.0 GLOSSARY OF TERMS	3	5.6.1 Bacterial Endotoxins.....	19
3.0 HOW DEPTH FILTERS WORK	8	5.6.2 Beta Glucans.....	19
3.1 Size Exclusion.....	8	5.7 Particle Shedding.....	20
3.2 Adsorption.....	10	5.8 Adsorption.....	20
3.3 Screening and Scalability.....	11	5.8.1 Protein Binding/Product Yield.....	20
3.4 Use of Filter Aids.....	12	5.8.2 Color Stripping by Carbon-Impregnated Depth Filters.....	20
4.0 PHYSICAL CHARACTERISTICS	13	5.9 Turbidity Measurement.....	21
4.1 Materials of Construction.....	13	5.10 Bacterial Challenge Testing.....	21
4.1.1 Source and Type of Filter Aids.....	13	5.11 Protection of Sterilizing Filters.....	21
4.1.1.1 Diatomite (diatomaceous earth, kieselguhr).....	13	6.0 CLEANING, SANITIZING AND STERILIZING FILTER INSTALLATIONS	22
4.1.1.2 Perlite.....	14	6.1 Steam Sterilization.....	22
4.1.1.3 Activated Carbon.....	14	6.1.1 Steam in Place (SIP).....	22
4.2 Filter Configurations.....	14	6.1.2 Autoclave Sterilization.....	22
4.3 Void Volume.....	15	6.2 Sanitization.....	23
4.4 Thickness.....	15	6.3 Flushing.....	23
4.5 Retention Rating.....	15	6.4 Lot-to-Lot Installation Testing.....	23
4.6 Flow Characteristics.....	16	6.5 Clean-In-Place (CIP).....	23
4.7 Chemical Compatibility.....	16	7.0 APPENDICES	24
4.8 Pressure Limitations.....	16	Appendix A: Retention Rating.....	24
4.9 Thermal Resistance.....	17	Appendix B: Thermal Stability, Extractables and Toxicity Testing.....	25
5.0 PERFORMANCE CHARACTERIZATION	18	Appendix C: Depth Filter Tests.....	28
5.1 Filter Lifetime.....	18	Appendix D: Installation Test Methods.....	30
5.2 Extractables and Leachables.....	18	Appendix E: Screening Studies.....	32
5.3 Conductivity.....	18	8.0 REFERENCES	34
5.4 Total Organic Carbon.....	18
