# Table of Contents

<b>1.0 INTRODUCTION .....</b>	<b>1</b>		
1.1 Purpose .....	1		
1.2 Scope .....	1		
<b>2.0 GLOSSARY AND ABBREVIATIONS .....</b>	<b>2</b>		
2.1 Abbreviations .....	3		
<b>3.0 ELEMENTS OF A CONTAMINATION CONTROL STRATEGY.....</b>	<b>3</b>		
3.1 Foundations of a Contamination Control Strategy.....	4		
3.1.1 Scientific Knowledge Foundational Element .....	4		
3.1.2 Quality Risk Management Foundational Element.....	6		
3.1.3 Personnel Awareness and Quality Culture Foundational Element .....	6		
<b>4.0 PROCESS DESIGN, MICROBIAL CONTROL, AND MONITORING .....</b>	<b>7</b>		
4.1 Low-Bioburden Drug Substance Process Control ....	8		
4.1.1 Viral and Mycoplasma Considerations .....	9		
4.2 Sterile Drug Product Process Control .....	10		
4.3 Nonsterile Drug Product Process Control .....	13		
4.4 In-Process Monitoring .....	13		
4.4.1 Bioburden/Endotoxin Monitoring .....	14		
<b>5.0 FACILITIES AND UTILITIES .....</b>	<b>16</b>		
5.1 Facility Design .....	16		
5.2 Personnel Flow .....	17		
5.3 Material and Waste Controls .....	17		
5.4 Cleaning and Disinfection for Facilities .....	18		
5.5 Utility Design, Control, and Validation.....	18		
5.6 Water and Steam.....	18		
5.7 Heating, Ventilation, and Air Conditioning .....	19		
5.8 Gases.....	19		
<b>6.0 RAW MATERIALS .....</b>	<b>20</b>		
6.1 Specifications .....	20		
6.2 Biological Contamination Risk .....	20		
6.3 Sources of Extraneous Bioburden .....	21		
6.4 Other Contaminants .....	21		
6.5 Sampling of Raw Materials and Excipients for Testing .....	21		
6.6 Importance of Supplier Quality Systems.....	22		
6.7 Starting Materials Unique to Biopharmaceutical Manufacturing.....	22		
6.8 Starting Materials for Advanced Therapy Medicinal Product Manufacturing.....	23		
<b>7.0 ENVIRONMENTAL CONTROL, VALIDATION, AND MONITORING.....</b>	<b>23</b>		
7.1 Environmental Performance Qualification.....	24		
7.1.1 Environmental Requalification.....	24		
7.1.2 Environmental Monitoring Critical Parameters .....	24		
7.2 Environment and Utility Disruption and Recovery Plan .....	25		
<b>8.0 PERSONNEL TRAINING AND QUALIFICATION ...</b>	<b>26</b>		
8.1 Basic Microbiology .....	26		
8.2 Personal Hygiene .....	27		
8.3 Gowning .....	27		
8.3.1 Gowning Qualification .....	27		
8.3.2 Gowning Disqualification and Requalification.....	27		
8.4 Cleanroom Behavior .....	28		
8.4.1 Aseptic Operator Training and Qualification .....	28		
8.4.2 Aseptic Observer Program.....	29		
<b>9.0 EQUIPMENT DESIGN, VALIDATION, AND ONGOING CONTROL .....</b>	<b>30</b>		
9.1 Equipment Design.....	30		
9.2 Equipment Cleaning Validation .....	31		
9.3 Equipment Ongoing Control .....	32		
9.4 Special Equipment Considerations .....	32		
9.4.1 Use of Single-Use Equipment.....	33		
9.4.2 Use of Barrier Technology.....	33		
9.4.3 Product Pathways .....	33		
9.5 Maintenance .....	33		
<b>10.0 PRODUCT CONTAINERS AND CLOSURES.....</b>	<b>34</b>		
10.1 Primary Container Closures .....	36		
10.2 End-to-End Container Closure and Container-Closure Integrity .....	36		
10.2.1 Design and Development of Container Closure.....	36		
10.2.2 Container-Closure Integrity Test Method Development and Method Validation ...	36		
10.2.3 Container Closure Integrity During Process Validation .....	36		
10.2.4 Container Closure Monitoring and Testing .....	37		
<b>11.0 QUALITY SYSTEMS.....</b>	<b>38</b>		
11.1 Trending and Metrics .....	38		
11.2 Investigation.....	38		
11.3 Corrective And Preventive Actions.....	39		
11.4 Change Control .....	39		
11.5 Quality Risk Management.....	39		
11.6 Quality Agreements and Vendor Management .....	40		
11.7 Quality Controls .....	40		

<b>12.0 CCS GOVERNANCE AND EFFECTIVENESS REVIEW .....</b>	<b>42</b>	<b>17.0 APPENDIX 3: CASE STUDIES FOR CONTAMINATION CONTROL.....</b>	<b>57</b>
<b>13.0 REFERENCES.....</b>	<b>42</b>	17.1 Case Study 1: Contamination Related to Equipment Maintenance.....	57
<b>14.0 RELEVANT GUIDANCE DOCUMENTS.....</b>	<b>44</b>	17.2 Case Study 2: Contamination Related to Blow-Fill-Seal Equipment Design and Maintenance .....	58
14.1 Associated PDA Technical Publications .....	44	17.3 Case Study 3: Contamination Related to Facility Construction.....	58
14.2 Relevant Global Guidances.....	44	17.4 Case Study 4: Disruption Recovery Program	59
14.2.1 International.....	44		
14.2.2 United States .....	45		
14.2.3 Europe .....	45		
14.2.4 Industry Associations.....	46		
<b>15.0 APPENDIX 1: PRACTICAL CONSIDERATIONS OF CONTAMINATION CONTROL STRATEGY ELEMENTS .....</b>	<b>46</b>	<b>18.0 APPENDIX 4: ILLUSTRATION OF CCS VARIABILITY BASED ON PROCESS.....</b>	<b>61</b>
<b>16.0 APPENDIX 2: EXAMPLES FOR ASSESSING IMPACT OF MICROBIAL EXCURSIONS .....</b>	<b>51</b>	<b>19.0 APPENDIX 5: TEMPLATE EXAMPLE FOR CONTAMINATION CONTROL STRATEGY DOCUMENT.....</b>	<b>62</b>
16.1 Example 1: Microbial Impact Assessment .....	52		
16.2 Microbial Impact Assessment Supporting Documents.....	55		
16.3 Example 2: Microbial Impact Assessment .....	56		

## FIGURES AND TABLES INDEX

<b>Figure 3.0-1</b> Elements of a Contamination Control Strategy .....	4	<b>Figure 8.4.2-1</b> Aseptic-Operator's Observation 7-Step Program .....	29
<b>Table 3.1.3-1</b> Example: Personnel Roles and Responsibilities Related to CCS .....	7	<b>Table 9.0-1</b> Holistic Approach to Equipment Considerations .....	31
<b>Figure 4.0-1</b> Potential Sources of Microbial Contamination to Consider when Conducting a Microbial Control Risk Assessment .....	8	<b>Figure 10.2-1</b> Fishbone Diagram Conveying a Comprehensive View of the Factors that have an Impact on Assuring Adequate CCI .....	35
<b>Table 4.2-1</b> Process Control Considerations .....	10	<b>Table 10.2.3-1</b> Functional CCI Considerations .....	37
<b>Table 4.2-2</b> Holistic Approach to Process Considerations .....	12	<b>Table 11.1-1</b> Examples of Metrics to be Assessed during Periodic Review .....	38
<b>Table 4.4.1-1</b> In-Process Monitoring Considerations.....	15	<b>Table 11.5-1</b> Examples of Foundational Risk Assessments that Support CCS.....	40
<b>Table 5.1-1</b> Holistic Approach to Facility Considerations .....	17	<b>Table 15.0-1</b> Structure of the Manufacturing Areas.....	46
<b>Table 5.1.4-1</b> Holistic Approach to Utility Considerations...	18	<b>Table 15.0-2</b> Multiuse or Single-Product Facility .....	47
<b>Table 8.0-1</b> Holistic Approach to Personnel Considerations .....	26	<b>Table 15.0-3</b> Storage of Materials and Equipment.....	48

<b>Table 15.0-4</b>	Path of Materials, Equipment, or Waste ...	48	<b>Table 16.1-1</b>	Microbial Impact Assessment Example 1 .	54
<b>Table 15.0-5</b>	Maintenance.....	49	<b>Table 16.3-1</b>	Microbial Impact Assessment Example 2 .	57
<b>Table 15.0-6</b>	Movement and Gowning of Personnel.....	50	<b>Table 17.4-1</b>	Example of Categorization of Disruption .	60
<b>Table 15.0-7</b>	Composition of DS and DP.....	50	<b>Table 17.4-2</b>	Example Recovery Plans .....	60
<b>Table 15.0-8</b>	Cleaning and Sterilization Processes .....	50	<b>Table 18.0-1</b>	Illustration of CCS Tailored to Example Process.....	61
<b>Table 15.0-9</b>	Environmental Monitoring.....	51	<b>Figure 18.0-1</b>	Illustration of CCS Elements Highlighting those that Require Enhance Controls for Example Processes.....	61
<b>Table 15.0-10</b>	Testing Controls or Alert Levels/ Action Limits.....	51			
<b>Figure 16.1-1</b>	Microbial Impact Assessment Methodology .....	52
